Summary

Backend Developer and Computer Science student specializing in **Java** and **Spring Boot** architecture with hands-on experience building **microservices-based systems**. Skilled in designing **RESTful APIs**, secure **JWT authentication**, and event-driven communication using **Apache Kafka**. Proficient in **MySQL** and **MongoDB** database design, containerization with **Docker**, and building scalable, production-style backend systems.

Education

Parul Institute of Technology <i>Bachelor of Technology in Computer Science with AI</i>	Expected May 2027 Vadodara, Gujarat
Sainath Jr. College <i>Higher Secondary Education</i>	May 2022 Navi Mumbai, Maharashtra
Sainath English High School <i>Secondary School Education</i>	May 2020 Navi Mumbai, Maharashtra

Technical Skills

Languages: Java 21, JavaScript
Frameworks: Spring Boot, Spring Cloud, React.js
Web & APIs: RESTful API Design, Microservices, JWT Auth, OAuth2/Keycloak, Apache Kafka
Databases: MySQL, MongoDB, JPA, Hibernate
Tools & Platforms: Docker, Git, GitHub, Postman

Projects

- Salon Booking Platform** | *Spring Boot, Spring Cloud, Eureka, Keycloak, Kafka, Docker, React*
- Architected a 10-service **microservices** platform with Eureka service discovery and **Keycloak (OAuth2/JWT)** authentication.
 - Implemented event-driven communication using **Apache Kafka** and integrated **Razorpay/Stripe** payments.
 - Containerized the system with **Docker Compose** across 10 coordinated services.
- Rippler** | *Spring Boot, JavaParser, React Flow, Framer Motion*
- Built a static analysis tool that maps service dependencies via **AST parsing** using JavaParser.
 - Detected FeignClient calls, Kafka pub/sub links, JPA mappings, and Spring injection chains automatically.
 - Designed a **React Flow** visualization with a **Blast Radius Simulation** feature for change impact analysis.
- Ecommerce Backend** | *Spring Boot 3.x, JWT, MySQL*
- Built a RESTful e-commerce backend with **JWT authentication** and role-based access control.
 - Designed a normalized **MySQL** schema for products, orders, and users.

Experience

- JPMorgan Chase** | *Software Engineering Job Simulation (Forage)*
- Integrated **Apache Kafka** with a Spring Boot microservice to process and deserialize **high-volume transaction messages** in real time.
 - Applied transaction validation and persistence logic using **Spring Data JPA** and an embedded H2 database, handling **multi-step transactional workflows**.
 - Engineered **3+ REST API endpoints** and integrated external incentive services using **RestTemplate** for end-to-end transaction processing.

Certifications & Achievements

Spring 5 Basics with Spring Boot <i>Infosys Springboard</i>	Feb 2026
AWS Academy Cloud Foundations <i>Amazon Web Services (AWS)</i>	Aug 2025
AI Fundamentals with IBM SkillsBuild <i>Cisco & IBM SkillsBuild</i>	Sep 2025
